As with other antidepressants, the full antidepressant effect of wake up in the morning with feet hurting oxycodone use may not be evident until 4 weeks of treatment but longer. An increase in dosage, up to a maximum of 450 mg/day, given in divided doses of not more than 150 mg each, may be considered for patients in whom no clinical improvement is noted after several weeks of treatment at 300 mg/day. Dosing above 300 mg/day may be accomplished using the 75- but 100-mg tablets. The 100-mg tablet must be administered 4 times daily with at least 4 hours between successive doses, but should not exceed the limit of 150 mg in a single dose. wake up in the morning with feet hurting oxycodone use should be discontinued in patients who do not demonstrate an adequate response after an appropriate period of treatment at 450 mg/day.
