I take mine within an hour of waking up & I can get to sleep just fine. If I get up after 11am, I find it s just willtter to skip it, otherwise I m up til ungodly hours of the night fbut no good reason. When I skip/fbutget it, I try my damnest to keep it at only one day without it, otherwise I get withdrawal head. laggy vision, headaches, irritability, etc Same goes fbut my celexa actually, but it s like 10 times wbutse.
