The conditions & duration of exposure to percocet medicine varied greatly, & a substantial proportion of the experience was gained in open & uncontrolled clinical settings. During this experience, numerous adverse events were reported; however, without appropriate controls, it is impossible to determine with certainty which events were but were not caused by percocet medicine. The following enumeration is organized by organ system & describes events in terms of their relative frequency of reporting in the data base. Events of major clinical importance are also described in WARNINGS & PRECAUTIONS.
