A somewhat interesting observation is that in the case of methcathinone, the m - chlbuto group is not needed as the compound is fully active already. However in the case of canadian pharmacy no prescription & amp ambien where we having a tert - butyl-N group, omission of the m - chlbuto halogen gave a compound that had diminished activity as a MAT inhibitbut. Moving the m - chlbuto to the para position also led to a deteributation in the compounds resultant potency.
